Executive Summary

Seniors and graduate students are asked to respond to a graduation survey at the end of the semester that they are registered for graduation. In the 2011-2012 academic year (Fall, Spring, and Summer semesters), 226 (20.1%) students completed the survey. Of these, a majority (60.2%) were undergraduate students. Business students were over-represented in the sample while Nursing undergraduate and Science graduate students were under-represented.

The majority of undergraduates surveyed began as transfer students, ranging from 55.6% for the school of Business to 87.5% for the School of Nursing. Based on these results, 62.0% of all graduating classes during the survey period started as transfer students. Further exploration of these results could reveal differences in satisfaction levels between first time freshmen and transfers.

While results of the graduation survey should be generalized to the total population with caution, there are several positive points. Of the Auburn University at Montgomery (AUM) undergraduate students who anticipated working full-time after graduation, the percentage securing employment at or near the time of graduation hovered around 50.0% for most schools. The School of Business showed the highest percentage of students securing employment at 57.1% percent. The lowest percentage of secured employment was in the School of Education (6.7%) and could be an artifact of certification issues. This could be an area of future exploration.

Almost 60.0% of undergraduates were interested in further education, either in graduate or undergraduate programs, with a fourth of this group already securing acceptance into graduate or professional schools. This means that 15.0% of all seniors, including those who did and did not express interest in graduate education, were accepted into graduate school at the time of graduation. Overall, undergraduate respondents reported being satisfied with how well their undergraduate experiences helped them acquire wide-ranging competencies, such as a broad general education in different fields of knowledge and an ability to think analytically. Of the competencies listed, approximately 80.0% said that they were either somewhat satisfied or very satisfied. Also, almost 90.0% of all AUM graduating seniors were satisfied that their undergraduate experiences challenged them to do their best.

Both undergraduate and graduate program graduates reported being satisfied with their instruction and most experiences that they had in their major. At least 85.0% of undergraduates surveyed were either somewhat or very satisfied that their major field experiences helped them to develop an ability write effectively and to effectively communicate orally. There might be an opportunity for AUM to bolster career advising services in the major field, since fewer undergraduates (48.4% - 90.0%) and graduates (33.3% - 77.1%) reported satisfaction with this component of their experience.

Over 75.0% of undergraduate respondents said that they were either somewhat or very satisfied with their overall experiences at AUM, such as the accessibility of faculty in general, the extent to which campus was free of discrimination, and that the financial investment of attending AUM was worthwhile. Over one-third of graduate level respondents were satisfied with these overall AUM experiences.

When students were asked if they would start over at AUM if they had to do it again, at least two-thirds of the respondents agreed that they would. In the School of Nursing, 90.0% of undergraduate students agreed that they would start over at AUM. When asked if they would recommend AUM to others, over four-fifths of undergraduate respondents and almost 90.0% of graduate students agreed that they would.

Introduction

At the end of each semester, undergraduate and graduate students who have registered for graduation are asked about their post-graduation plans and their experiences in their major and at AUM, in general. In this report, results are aggregated for the academic year (Fall, Spring, and Summer semesters) and disaggregated by the degree they anticipated receiving. Undergraduate degree-seekers were asked additional questions about their transfer status and their undergraduate experiences.

In 2011-2012, 226 graduating students responded to the survey for a response rate of 20.1%. Of these, 136 (60.2%) were undergraduate students and 90 (39.8%) were graduate students.

| | AUM (N=226) | Business (n=67) | Education (n=57) | Liberal Arts (n=35) | Nursing (n=10) | Sciences (n=54) |
|----------------------|----------------|--------------------|---------------------|---------------------------|-------------------|--------------------|
| Undergraduate | 136 (60.2%) | 41 (61.2%) | 19 (33.3%) | 29 (82.9%) | 10 (100.0%) | 37 (68.5%) |

*Three graduate students did not indicate their school.

All schools were represented at the undergraduate level; all schools except for Nursing (whose students are reported by Auburn University) were represented at the graduate level. Business was slightly over-represented and Nursing under-represented among undergraduate responses. Business was over-represented and Sciences under-represented among graduate responses.

Undergraduate Results

Transfer Status

Of the graduating seniors who answered the survey, most (61.8 %) transferred to AUM after attending another school. This was especially true of students in the School of Nursing. Students who graduated from the School of Business were more likely than those from other schools to start and complete their coursework at AUM (44.4%).

| | AUM (n=123) | Business (n=36) | Education (n=18) | Liberal Arts (n=28) | Nursing (n=8) | Sciences (n=33) |
|--|----------------|--------------------|---------------------|---------------------------|------------------|--------------------|
