Political philosophy from Ancient Greek sources and the Social Contract tradition, as well as critical responses concerning gendered and racialized subordination

▷ **Philosophy of Art**

(2 sections at WMU: Sp14, Fa14)

Definitions of art, theories of aesthetic evaluation, the relevance of gender and other cultural norms, the role of artist's intentions, the role of technology in creating art
(Continued)

Upper Division Undergraduate Courses Taught (continued)

▷ **Metaethics**

(1 section at UCSB: Sp09)

Theories about the nature and existence of moral properties and moral truths, attempts to analyze moral properties as natural properties, attempts to explain away moral properties in terms of moral fictions or emotionally expressive language

▷ **Hume**

(1 section at UCSB: Fa07)

David Hume's mature metaphysics, epistemology, ethics, and philosophy of religion

Graduate Seminars Taught

▷ **Special Topics in Philosophy: Social and Political Philosophy**

(1 section at AUM, Sp22)

Political philosophy from Ancient Greek sources and the Social Contract tradition, as well as critical responses concerning gendered and racialized subordination

▷ **Problems of Intensionality (Philosophy of Language)**

(1 section at WMU: Sp15)

"Intensional" expressions express beliefs (as in "Alex believes it's raining") or other representations (as in "Alex reveres Zeus," which concerns Alex's attitude toward something). These raise problems for linguistic analysis, as they often seem to refer to nonexistent things. (For example, how can "Alex reveres Zeus" be true if there is no Zeus, and therefore, nothing that Alex reveres?) We surveyed influential historical approaches (medieval and early 20th-century), followed by contemporary approaches.

Research Interests

Much of my research concerns *representation*, in forms such as linguistic, mental, pictorial, and fictional, and phenomena such as *de re* representation and representation of things to which we deny commitment (e.g., so-called negative existentials). Much of it also concerns *artifacts*, such as fictional objects and works of fiction, languages and linguistic expressions, institutions, and concepts, and phenomena such as derived intentionality, functions, and abstract artifacts.

Works in Progress

- ▷ “What is the Problem of Negative Existentials?”
I give a new analysis of this problem as a paradox, which better explains the extent and difficulty of the problem and helps us compare and evaluate possible solutions.
- ▷ “Particularity in Fiction”
What distinguishes a fiction according to which there are ghosts from a fiction “about a particular (fictional) ghost”? Kendall Walton has sketched an answer, but it is incomplete and threatens to collapse the distinction. I solve these problems and develop the solution using concepts from contemporary psychology.

Works in Progress (continued)

▷ “Fictional Objects and Artifacts”

Many theorists hold that fictional objects are artifacts. So what work is required to create them? John Searle suggests it is certain speech acts. Using a broad variety of examples, I show that this is inadequate, and that contrary to a widespread assumption, fictional objects need not be *intentionally* created.

(continued)

▷ “Creating Fictional Objects *De Dicto*”

Nicholas Wolterstorff, Gregory Currie, and Alberto Voltolini explain the creation of fictional objects in terms of general propositions made true in works of fiction. I critically analyze these three accounts and argue that creation is better understood in terms of Walton’s analysis of particularity in fiction.
