HOW TO BECOME A STATISTICIAN

- Statisticians typically need at least a bachelor’s degree and significant coursework in mathematics and statistics.
- Students often need to take mathematics courses such as calculus, differential equations, and linear algebra. Students also commonly take courses in a related field, such as computer science, physics, or biology.
- At the college level, courses in processing and analyzing data are important in addition to math and statistics. Students must learn data-oriented programming languages such as R or Python for presenting analyses.
- To prepare students to work in industry, students may also take courses in another field, such as computer science, life sciences, or physical sciences. For example, coursework in biology, chemistry, or health sciences is useful for testing pharmaceutical or agricultural products. Physics may be useful for statisticians working in manufacturing or quality improvement.

TOTAL COURSE CREDIT HOURS REQUIRED: 13
WHAT DOES A STATISTICIAN DO?

- Decide what data are needed to answer specific questions or problems.
- Apply statistical theories and techniques to solve practical problems in business, engineering, and the sciences.
- Design surveys, experiments, or opinion polls to collect data.
- Develop statistical models to analyze data.
- Interpret data and communicate analyses to technical and nontechnical audiences.
- Use statistical software to analyze data and create visualizations to aid decision making in business.
- Statisticians typically work in offices. They also may work on teams with engineers, scientists, and other specialists.

JOB OUTLOOK

Employment of statisticians is projected to grow 31 percent from 2021 to 2031, much faster than the average for all occupations.

WHAT DOES A STATISTICIAN DO?

Karen Simpson
B.S. Mathematics and Computer Science double major 2018, software engineer at EBSCO Information Services.

WHAT DOES A STATISTICIAN DO?

Emily Cosgrove
B.S. Mathematics and Computer Science double major 2019, software engineer II at EBSCO Information Services.

Eddie Lyndsey
B.S. Mathematics and Computer Science double major 2017, software engineer at Parsons Corporation.

Blake Boswell

Jordan Price
B.S. Mathematics and Computer Science double major 2016, sales engineer at Daxko.

Johnathan Henson
B.S. Mathematics 2008, principal software engineer at Amazon.

WHY STUDY STATISTICS AT AUM?

STATE-OF-THE-ART

Students are trained using state-of-the-art software such as R programming. Topics include theoretical foundations and modern real-world applications.

SMALL CLASS SIZES

Most classes have no more than 25 students, allowing close supervision and networking with faculty.

PROFESSIONAL DEVELOPMENT

Math Club; Pre-Engineering Club
